

EPILOG LASER

Proven Innovation and Excellence

In 1988, the idea to build the world's first desktop laser engraving system seemed a bit far-fetched. After all, developing the first laser machine of its kind, along with creating and cultivating an entire industry

is no easy feat. Luckily, two engineers were up to the challenge. Steve Garnier and John Doran - the founders of Epilog - had the vision and drive to create a new kind of engraving machine, unlike anything anyone in the industry had ever encountered. As the two came closer to perfecting the first system, they began tackling the next logical question - can we make it affordable to the mass market?

With a successful prototype to demonstrate and a newly-formed business, Steve and John headed out on the tradeshow circuit to find out if their idea would appeal to the masses. The answer was, and continues to be, a resounding "yes" as we have spent over 20 years providing laser solutions for awards shops, large manufacturing companies, home-based businesses and both small and large enterprises around the world. It seems everyone knows that if you want a laser engraver of premier quality for an affordable price, you want an Epilog.

Today, Epilog is stronger than ever with the top series of laser engraving and cutting systems in the industry. From our introductory-level Epilog Zing Starter Series to our top-of-the-line Legend 36EXT to our Industrial FiberMark Series, we have a system to meet your needs. We are proud to say that all of our laser systems are 100% designed, engineered and manufactured in the USA!

Epilog is known for implementing useful features that enhance our customers' ability to work with ease, increase their efficiency and boost their profitability. A combination of our ingenuity and experience has allowed us to escalate our growth over time, with the best years ahead of us!

What can a customer expect from Epilog Laser?

Besides getting the world's most advanced laser system from the company that began the laser engraving revolution, Epilog offers a number of after-purchase benefits that help you get the most out of your machine. Among the many other benefits, you'll be able to attend our Laser User Clinics and Corel Seminars, the most popular educational events in the laser industry.

Our website features a wealth of valuable information for our customers as well. Each month, new files are added to the Sample Club section of our site. From architectural models to picture frames to holiday decorations, you'll find all kinds of fun, interesting, and profitable projects to create with your laser.

The Sample Club is just one of the methods we use to keep connected with Epilog owners on an ongoing basis. You can use our website to sign up for our e-mail newsletter or to be instantly notified of new updates for the systems you own. We also feature a Virtual Training Suite to learn how to get started on your laser; a Technical Library filled with articles about the technical features of our systems, maintenance and project setup; and a video library that is filled with examples of the numerous materials that can be engraved and cut.

What makes Epilog Laser unique?

We'll show you that we have the highest quality laser systems in the industry through our engraving and cutting capabilities, but what are some of the other items that really make Epilog stand out from the other laser manufacturers?

We have distributors with more experience and industry knowledge.

We have a dedication to developing and nurturing long-standing relationships with our distributors, ensuring you always have the most experienced and knowledgeable sales and technical support teams in the industry. Who will you call locally when you need help or advice? With Epilog you always know your distributor will be there for the long haul.

We specialize in truly outstanding technical support.

We take incredible pride in the fact that our customers love our technical support team. They are recognized throughout the industry as being the most knowledgeable about laser systems, and can troubleshoot any challenge you may encounter. They'll also provide support on how to achieve better engraving results. From part ordering to technical questions, our tech support team is there to assist you each step of the way.

We'd love to go paperless - but you like our manuals too much!

We understand the importance to someone learning the laser to having a paper manual in their hands as they ask questions - that's why we've developed a manual for our laser systems that is filled with over 270 pages of laser information, techniques and more. With Epilog's laser systems, we won't drop it off with a quick start guide and nothing else - our manuals are filled with useful information. If you prefer the paperless version, we also have the latest manual versions available for download on our website.

A dedication to continuing education.

As technologies evolve and customer needs become more sophisticated, we realize the importance of continuing education in the laser engraving industry. In fact, Epilog Laser is widely recognized as the best source of aftermarket training programs to ensure our users stay current on the latest laser engraving applications and techniques.

When we update our software, we want you to know.

It's three in the morning and you want to know if there is a new driver for your laser - go online and check! We put our drivers and firmware online so you can download them when you want. You can even sign up for an email notification to be sent to you whenever we update the software for your laser system.

You need inspiration, and we love to inspire.

Need a new idea for what to create with your laser? We're here to help! Visit our extensive Sample Club and download files created by employees at Epilog Laser. We've compiled hundreds of our favorite samples, and are constantly adding new ideas that you can turn into profitable product offerings.

The most dedicated, loyal, talented employees.

At Epilog, we could not provide such high-quality service to our customers if we did not have the most dedicated and talented employees. In fact, Epilog has consistently ranked as one of the best places to work in Denver, CO. Our incredibly low turnover rate means you have knowledgeable and experienced support at all levels.
